

PRODUCT GUIDE

LUBRICANTS, CLEANERS & COATINGS

DRY FILM SILICONE

FG04 | MPI C26
Product Code 7204 | 400ml

A dry, non sticking lubricant that is an excellent release and parting agent for use on food handling and sorting lines. It lubricates and protects therefore eliminating sticking, binding and squealing on rubber, plastic and metal parts. Leaves a dry fogging film which resists dirt and dust build-up providing good water and chemical resistance.

CONTAMINANT RELEASE SPRAY

FG15 CRS | MPI C26
Product Code 7215 500ml | 7218 5L | 7219 20L

High performance inert blend of chemicals formulated for the release of organic contaminants, dirt, grease, grime and oil from machinery and electrical equipment in the food industry.

BELT GRIP

FG24 | MPI C26
Product Code 7224 | 400ml

Suitable for incidental food contact. A tacky formulation which adheres strongly to belts assisting transmission efficiency and drive. Suitable for both indoor and outdoor belt applications irrespective of humidity or temperature conditions. The formulation keeps belts flexible, pliable and resistant to cracking, ensuring and extending the life of old belts.

LUBE 4 PENETRENE

FG44 | MPI C15
Product Code 7244 | 400ml

A multi tasking product that lubricates, penetrates and stops corrosion on food processing equipment and machinery. The low viscosity of Lube 4 stops noisy squeaking and squealing. Penetrates effectively breaking free corroded components. It leaves a thin non-drying colourless film which is safe on most surfaces including plastics and rubber.

HI TEMP CHAINLUBE

FG54 | MPI C15
Product Code 7254 | 500ml

High performance chain spray developed for the lubrication of Roller, Drive and Bi-plane conveyor chains subject to high temperatures and loads in the food industry; slaughterhouses, bakers, beverage and food manufacturing etc. Exceptional resistance to high temperatures +240°C.

HI-LO DUAL TEMP GREASE

FG64 | MPI C15
Product Code 7264 | 500ml

High performance extreme pressure food grade lubricant which is suitable for the lubrication of numerous applications in the food industry operating at both low or high temperatures -40°C to +180°C. Freezers, chillers, ovens and sterilisers.

SILICONE LUBE

FG74 | MPI C26
Product Code 7274 | 400ml

Suitable for incidental food contact. Contains a high quality food grade approved silicone. Non-toxic, non-staining, tasteless, odourless and contains no solvents. Prevents sticking and binding on all food equipment and machinery, slideways and stainless steel chutes.

PTFE DRY LUBE

FG84 | MPI C15
Product Code 7284 | 400ml

Suitable for incidental food contact. Contains PTFE (Polytetrafluorethylene) based dry film lubricant and can be used where ever oil or silicone free lubrication is required. A white, non-toxic odourless film that provides a lubricated medium with low frictional proper ties and is unaffected by water, steam and most chemicals.

MEAT RAIL LUBE

FG94 | MPI C26

Product Code 7294 500ml | 7298 5L | 7299 20L

High performance Meat rail spray formulated as a friction modifier for conveyor rails and transport chains subject to high temperatures and loads in the food industry allowing easy transfer of carcass gambrel skids and trolleys. Suitable from low temperatures 0° to +240°C assisting in corrosion and rust prevention.

CIRCUIT REVIVER

MPI C12

Product Code 7174 | 400ml

FOR DISSOLVING CORROSION & CARBON

Dissolves corrosion, oxide & carbon deposits on multi plugs, contacts, PCB's & electrical fittings. Removes carbon after flash over in control cabinets & multi boxes. An oil based formulation with etching agents. Safe on plastics Residue can be rinsed off with Circuit Cleaner.

CONTACT CLEANER

MPI C12

Product Code 7115 | 500ml

PRECISION ELECTRICAL & ELECTRONIC EQUIPMENT CLEANER

Cleans sensitive components, gentle but effective cleaner, harmless to paint, plastic & rubber, residue free & fast evaporation. Low toxicity.

ELECTRO CLEAN

MPI C12

Product Code 7125 | 400ml/600gm

Product Code 7128 | 5L

Product Code 7129 | 20L

NON FLAMMABLE HEAVY DUTY ELECTRICAL EQUIPMENT CLEANER

Evaporates quickly, residue free, a special mixture of heavy duty solvents, repels water & moisture, removes oils & grease from electrical & mechanical equipment. May harm plastics & rubber.

RW CLEANER

MPI C12

Product Code 7155 | 500ml

Product Code 7159 | 20L

HEAVY DUTY LOW TOXICITY INDUSTRIAL AND ELECTRICAL EQUIPMENT CLEANER

RW Cleaner is a specially formulated heavy duty cleaner for removing contamination in the engineering and electrical equipment fields.

IPA CLEANER

MPI C12

Product Code 7033 | 300ml

SAFE CLEANER FOR ELECTRONIC EQUIPMENT

Sanitises soft and hard surfaces. Kills a range of bacteria, enveloped viruses, fungi and yeasts. Kills 99.9% of germs. Effective against a wide range of pathogens. Rapidly evaporates without leaving an odour. QAC free. Excellent for use on hard to reach areas.

24/7 ELECTRICAL FORMULA

Product Code 7335 | 500ml

DISPLACES MOISTURE, LUBRICATES, PROTECTS AND CONTROLS CORROSION

24/7 is a multi-functional formula which protects, lubricates and can help to prevent electrical failure under poor environmental conditions such as moisture, corrosion, dirt, friction, flooding, high humidity and salt air.

It stops short circuits, leakage and arcing and improves efficiency due to the restoration.

Contains VCI – Vapour Control Inhibitors.

SILICONE 1000

MPI C22

Product Code 7314 | 400ml

VISCOUS INSULATION & LUBRICATING SPRAY

High quality electrical value silicone, dielectric strength 16 kV/mm, wide temperature range - 50°C to +200°C, water repellent & moisture buffer.

CONVAS

MPI C12

Product Code 7354 | 400ml

HIGH PURITY VASELINE FORMULA

Lubricates HRC fuses & switches, links, switching gear & disconnects. Protects battery terminals from oxidation & verdigris deposits. Low viscosity encapsulates hairline fractures on battery surfaces & terminals, preventing the emission of corrosive fumes.

CABLE GLIDE

MPI C12

Product Code 7344 | 400ml

CABLE PULLING LUBRICANT

High quality lubricant for all horizontal, vertical pulls. Superior friction reduction. Compatible with all common cable types.

PLASTI SEAL

MPI C22
Product Code 7323 | 250ml
Product Code 7328 | 5L

TRANSPARENT WATER PROOF COATING

For electrical, electronic & PCB components. A shiny flexible film that resists acid, salt, fungus, thermal stress, moisture & touch environmental conditions.

BLUE LUBE

MPI C12
Product Code 7377 | 1L
Product Code 7379 | 20L

CABLE PULLING LUBRICANT

For horizontal & vertical pulls, superior friction reduction non-toxic, non-flammable, compatible with all common cable types.

MICRO LUBE

Product Code 7365 | 500ml
Product Code 7369 | 10L

FIBRE OPTIC JETTING CABLE LUBRICANT

Superior lubrication film. Compatible with all types of cable & ducts. Coats evenly & clings to cable. Pourable low viscosity.

APPLICATOR BOTTLE

Product Code 7999 | 500ml

DRY LUBE PTFE

MPI C12
Product Code 7484 | 400ml

DRY FILM LUBRICANT

Excellent anti-stick properties, wide temperature range -100°C to +260°C, contains PTFE for superior lubrication, non-toxic & non-staining.

WHITE LITHIUM GREASE

Product Code 7424 | 400ml

MULTI PURPOSE WHITE LITHIUM COMPLEX GREASE

White Lithium Grease has a high drop point (280°C) & high polymer treatment level, which makes this is a versatile grease for multi purpose applications.

NICKEL ANTI-SEIZE

Product Code 7444 | 400ml
Product Code 7445 | 500gm

EXTREME TEMPERATURE ANTI-SEIZE PROTECTION

Anti-seize protection for stainless steel fasteners. Formulated to prevent seizure of threaded components which are subjected to extremely high temperatures or adverse environmental conditions.

COPPER ANTI-SEIZE

Product Code 7474 | 400ml
Product Code 7475 | 500gm

HIGH TEMPERATURE ANTI-SEIZE PROTECTION.

Protects against burning-in, seizing, self-welding & galvanic fusion. Separates & seals out corrosive environments. Eases assembly & disassembly of studs, bolts, flanges, screws & fittings.

GRAPHITE SPL

Product Code 7455 | 500ml

Track & Rail Switchplate lubricant which contains graphite to reduce wear. It is rain & corrosion resistant with extreme pressure & anti-wear properties. Excellent temperature range from -30°C to +140°C.

STAINLESS STEEL CLEANER

MPI C22
Product Code 7165 | 500ml

WHITE NON-EVAPORATING FOAMY SPRAY WHICH MAKES FOR EASIER CLEANING AND POLISHING

Chemz Stainless Steel Cleaner leaves a streak free polished surface which reduces blemishes such as finger prints. Chemz Stainless Steel Cleaner one application cleans and polishes with no greasy surface remnants. Suitable for different grades of stainless including bead blasted finishes.

GLASS CLEANER

MPI C35
Product Code 7195 | 500ml

FOAM CLEANER WITH ANTI-STATIC & ANTI-FOG ACTION

Removes dirt & greasy film, leaves streak-free surface, will not stain, scratch or abrade, cleans glass, plastics, ceramics & metals.

WASP

(WELD ANTI SPATTER)
MPI C12
Product Code 7734 | 400ml

PROVIDES ANTI-ADHERENT SPATTER EFFECT ON METAL SURFACES

For MIG & electrode welding, suitable for all metals in common use, prolongs nozzle life - economical to use, non flammable.

XTRA CUTTING OIL

MPI C12
Product Code 7714 | 400ml
Product Code 7718 | 5L

GENERAL PURPOSE DRILLING & CUTTING LUBRICANT

Excellent hang on for vertical surfaces. Lubricates & cools efficiently, reduces friction & wear, for use on ferrous & non-ferrous metals, improves surface finish.

LABEL STRIP

MPI 101 - 69
Product Code 7774 | 400ml
Product Code 7778 | 5L

REMOVES ADHESIVE LABELS EASILY & QUICKLY

Penetrates & neutralizes adhesive, does not damage surfaces, residue easily wiped off, useful in home, office or industry.

LANO SHIELD

MPI C12
Product Code 7755 | 500ml
Product Code 7758 | 5L
Product Code 7759 | 20L

HEAVY DUTY NATURAL LANOLIN PROTECTION

Lano Shield is a natural lubricant with lanolin protection against the effects of salts - alkalis & acids giving long term corrosion protection. Offers excellent anti-seize protection. Prevents thread seizure & assists in disassembly even after many years.

HI TAC

MPI C12
Product Code 7764 | 400ml

HEAVY DUTY MULTI PURPOSE TACKY LUBRICANT

Excellent anti-wear properties, resistant to steam & water, prevents corrosion in all weather, tacky adhesion qualities. Solvents evaporate after a short period, leaving a highly adhesive lubricant.

CHAIN LUBE

MPI C12
Product Code 7744 | 400ml
Product Code 7748 | 5L
Product Code 7749 | 20L

ADHESIVE LUBRICANT FOR CHAINS & WIRE ROPES

Resistance to hot/cold & salt water, temperature range - 30°C to 180°C, reduces friction & wear, provides continuous lubrication.

350 SILICONE

MPI C12
Product Code 7836 | 600ml
Product Code 7839 | 20L

CLEAR MULTIPURPOSE LUBRICANT & PROTECTANT

Lubricates, waterproofs & protects, does not mark or stain, suitable for use on all types of surfaces, wide temperature range -50°C to +250°C. Reduces friction. Excellent mould release. Ideal lubricant for sliding doors, aluminium window hinges.

M18 SOFT SHIELD

Product Code 7784 | 400ml

WAX BASED CORROSION PROTECTION FOR METAL SURFACES

Soft Shield M18 provides an effective long term outdoor (up to 18 months), & indoor (up to 5 years) anti-corrosion protection for all kinds of metals & alloys.

PENETRENE MULTI

MPI C12
Product Code 7304 | 400ml
Product Code 7308 | 5L
Product Code 7309 | 20L

LUBRICATES, PENETRATES, LOOSENS RUST & DRIVES OUT MOISTURE

For all mechanical & industrial equipment. Forms an invisible protective film, harmless to plastics, rubber, paint & prevents corrosion.

ZINC

MPI C23

Product Code 7533 | 300ml/385gm

ZINC RICH COATING FOR CORROSION & RUST PROTECTION

Film contains 99% pure zinc, electrochemically bonds to bare metal, provides active galvanic protection, fast drying.

ZINC WHITE

MPI C23

Product Code 7524 | 400ml

ZINC RICH PROTECTION COATING FOR BARE METAL

Coloured film contains pure zinc complexes, electrochemically bonds to bare metal, provides resistance to corrosive environments, fast dry to deep semi gloss finish.

ZINC SILVER

MPI C23

Product Code 7544 | 400ml

BRIGHT SHINY METALLIC COATING FOR ALL METALS

For damaged hot galvanised repair work, corrosion & wether resistant coating, quick drying single component product, dries to colour of new galvanising.

ZINC BLACK

MPI C23

Product Code 7554 | 400ml

ZINC RICH PROTECTION COATING FOR BARE METAL

Coloured film contains pure zinc complexes, electrochemically bonds to bare metal, provides resistance to corrosive environments, fast dry to deep semi gloss finish.

ZINC ORANGE

MPI C23

Product Code 7514 | 400ml

ZINC RICH PROTECTION COATING FOR BARE METAL

Coloured film contains pure zinc complexes, electrochemically bonds to bare metal, provides resistance to corrosive environments, fast dry to deep semi gloss finish.

ZINC RED

MPI C23

Product Code 7564 | 400ml

ZINC RICH PROTECTION COATING FOR BARE METAL

Coloured film contains pure zinc complexes, electrochemically bonds to bare metal, provides resistance to corrosive environments, fast dry to deep semi gloss finish.

ZINC GREEN

MPI C23

Product Code 7574 | 400ml

ZINC RICH PROTECTION COATING FOR BARE METAL

Coloured film contains pure zinc complexes, electrochemically bonds to bare metal, provides resistance to corrosive environments, fast dry to deep semi gloss finish.

ZINC BLUE

MPI C23

Product Code 7584 | 400ml

ZINC RICH PROTECTION COATING FOR BARE METAL

Coloured film contains pure zinc complexes, electrochemically bonds to bare metal, provides resistance to corrosive environments, fast dry to deep semi gloss finish.

ZINC YELLOW

MPI C23

Product Code 7594 | 400ml

ZINC RICH PROTECTION COATING FOR BARE METAL

Coloured film contains pure zinc complexes, electrochemically bonds to bare metal, provides resistance to corrosive environments, fast dry to deep semi gloss finish.

ETCH-IT UR10 UNIVERSAL RED

Product Code 8614 | 400ml

ETCH IT METAL PRIMERS ARE SINGLE PACK ANTI-CORROSIVE METAL PRE TREATMENT & ETCH PRIMERS

Excellent adhesion & protective qualities & is formulated for use on aluminium, ferrous & non-ferrous metals. Fast drying & suitable for interior & exterior use.

ETCH-IT UG8 UNIVERSAL GREY

Product Code 8674 | 400ml

ETCH IT METAL PRIMERS ARE SINGLE PACK ANTI-CORROSIVE METAL PRE TREATMENT & ETCH PRIMERS

Excellent adhesion & protective qualities & is formulated for use on aluminium, ferrous & non-ferrous metals. Fast drying & suitable for interior & exterior use.

NO.8 HANDYLUBE

MPI C12

Product Code 7384 | 400ml

Product Code 7388 | 5L

Product Code 7389 | 20L

STOP SQUEAKS, CLEANS, LUBRICATES & PENETRATES

Super lubricator, rapid penetrator, squeak stopper, metal protector, moisture displacer. Has hundreds of uses on the job, in industry, on the farm, at home & recreation. Leaves oily residue.

PENETRENE MULTI

MPI C12

Product Code 7304 | 400ml

Product Code 7308 | 5L

Product Code 7309 | 20L

LUBRICATES, PENETRATES, LOOSENS RUST & DRIVES OUT MOISTURE

For all mechanical & industrial equipment. Forms an invisible protective film, harmless to plastics, rubber, paint & prevents corrosion.

Z7 BRAKECLEAN

MPI C12

Product Code 7816 | 600ml

Product Code 7818 | 5L

Product Code 7819 | 20L

BRAKE, CLUTCH & INDUSTRIAL PARTSCLEANER

An effective heavy duty cleaner for industrial parts to remove oil & grease. Ideal for pre-assembly cleaning. Non staining, non corrosive & residue free, with fast evaporation. Protect rubber, plastics & painted surfaces from overspray.

ZAP

MPI C12

Product Code 7866 | 600ml

ENGINE DEGREASER SPRAY ON HOSE OFF

Specially formulated as a water soluble degreaser. Spray on hose off. Removes oil & grease from car, truck, boat, tractor & lawnmower engines. Suitable for removing oil & grease on concrete floors.

GREASE EATER

MPI C12

Product Code 7885 | 500ml/500gm

Product Code 7889 | 20L

HARD HITTING WATER BASED CLEANER & DEGREASER

Biodegradable, non toxic & non acidic. Petroleum solvent free. Formulated for use on degreasing engines, machinery, heavy equipment & automotive parts. Excellent for removing grease & oil from workshop floors.

CARBZ

MPI C12

Product Code 7825 | 500ml

THROTTLE BODY & CARB CLEANER

Formulated to quickly & easily remove gum, sludge, varnish, paraffin, gasoline stains, grease & dirt build up from carburetors, throttle bodies, automatic chokes, PCV & EGR valves.

EZY SHINE

Product Code 7876 | 600ml

Product Code 7879 | 20L

WET LOOK TYRE SHINE

Ultra high gloss wet look is the simplest & most effective way to shine tyres, mudflaps & bumpers. Formulated to prevent colour disfiguration of tyres without damaging paintwork or wheels.

ICE FIGHTER

Product Code 7803 | 250ml

AUTOMOTIVE AND EQUIPMENT DE-ICER

Removes frost from all types of glass. Releases frozen door locks. Quick acting. Leaves no smears. Helps prevent refreezing.

RAPID BRAKE CLEANER

MPI C12

Product Code 7856 | 600ml

Product Code 7859 | 20L

AN ADVANCED ALCOHOL BASED FORMULA

Quickly remove brake fluids, grease & oil from brake linings, pads, drums, clutches & CV joints. Powerful jet action spray nozzle. Fast drying.

MX4 BIKE SHINE
Product Code 7675 | 500ml

Suitable for helmets, gloves, leathers, boots, mudguards, farings, exhausts, instrument panels & all surfaces requiring coating & long lasting shine.

MX3 CHAIN LUBE
Product Code 7652 | 250ml
Product Code 7655 | 500ml

Formulated for use on all motorcycle chains. Penetrates inner pins, rollers & bushings & after propellant evaporates thickens to a long lasting lubricant. Safe on O'rings.

MX5 SPRAY'N'CLEAN
Product Code 7665 | 500ml

WET LOOK TYRE SHINE
Spray on, wipe off. Effectively cuts through grease & grime removing film from motorcycle tanks, farings, guards, panniers, rims, cooling fans, exhausts, suspensions & brake units.

BLOK IT
Product Code 8404 | 400ml

LOG MARKER RED
Product Code 8414 | 435ml

LOG MARKER BLUE
Product Code 8454 | 435ml

LOG MARKER ORANGE

AEROSOL SPRAY WAND
PRODUCT CODE 7991 suits a 500ml can
PRODUCT CODE 7993 suits a 400ml can

IMPORTANT! READ THE DIRECTIONS ON THE BACK OF CHEMZ AEROSOL CANS

Our experience is that people use our aerosol products without reading the DIRECTIONS on the back of the aerosol can label and refer to the Directions only if things go wrong.

Important directions include testing the product on an inconspicuous area to ensure it won't cause damage, storing the product away from heat sources and direct sunlight and correctly agitating paint aerosols then clearing the nozzle.

So please read the Directions before you use any Chemz aerosol product as we cannot accept responsibility for incorrect use or storage.

AEROSOLS - WHAT YOU CAN AND CAN'T RECYCLE

Products sold in aerosol containers are under pressure and need to be used carefully.

USING AEROSOLS

The products in aerosol cans are packed under pressure, which means the cans can explode if they get damaged.

Often, the product inside the can is something that can catch fire easily, so you need to be careful of that too. Make sure to:

- Read the label carefully and follow all the directions.
- Check the aerosol can for damage and leaks before you use it.
- Avoid breathing in the product as you spray.
- Use the spray outside if possible.
- If you must use the product inside, keep windows open. If the label advises you to keep windows shut, leave the area as soon as you have sprayed and stay away until the product has had time to settle.
- Keep far away from fire and heat, including cigarettes.

STORING AEROSOLS

Aerosol cans can leak or even explode if they are damaged. The leaked product may catch fire if it is near heat or a flame. Make sure you store all aerosol cans carefully to keep yourself and others safe. Be sure to:

- Keep cans away from flames or heat sources.
- Check cans before you put them away. Look for damage, listen for hissing sounds, and be alert for the smell of a leak.
- Store cans in a place that has a bit of space and stays cool. Don't put them in car glove boxes.
- Keep cans out of children's reach and sight

DISPOSING OF USED AEROSOL CANS

Check with your local council or recycling service to see if it accepts aerosol cans for recycling. Many do not, and some may want you to drop your aerosol cans somewhere specifically, or take some steps to prepare the can for recycling. Some may have special requirements for doing so.

Before recycling or throwing away your aerosol can, you need to make sure it's entirely empty. You may need to spray the last of the contents into a box or bag to throw away separately.

NEVER INHALE AN AEROSOL

It is very dangerous to inhale the contents of aerosol cans on purpose. Even doing this just once can kill you. Doing this regularly over a long period can cause damage to your brain, nervous system, and other organs. Never ever intentionally inhale aerosol products.

If you think someone is sick from inhaling aerosols, call 111 straight away to get an ambulance.
