

T-Bolt Clamps

Murray Corporation is a T-bolt clamp manufacturer providing industrial clamps and other parts in large quantities to some of the top companies in a variety of industries. When it comes to parts TB Model clamps or T-Bolt clamps, we provide the highest quality in materials and craftsmanship to keep your connections together.

T-Bolt Band Clamp Properties

Murray T-Bolt band clamps are designed to provide connections without leaks. Band edges are rounded to protect the hose.

TB series clamps use a plated steel bolt and self-locking nut. The balance of the components is made from 300 series stainless steel.

TBSS series clamps are made entirely from 300 series stainless steel. Clamps are also available in 316 Stainless Steel as special order items. The maximum service temperature for the locknut is 250° (F).

Material Options for T-Bolt Clamps

Murray's T-bolt clamps are manufactured with materials in accordance with industry standards to provide high quality and consistency in performance. Zinc Plating is done to industry specifications, and our stainless-steel grades are made to AISI and other key global standards. You can rest assured you are receiving the grade of the material requested every time you order from us.

Industries We Serve

Murray provides quality parts to a wide variety of industries. Our T-bolt clamps are effective and available in several specifications. Our products commonly used industries and applications such as:

- Marine Applications
- Agriculture
- Automotive
- Heavy Duty Trucks
- Industrial Applications
- Irrigation Systems

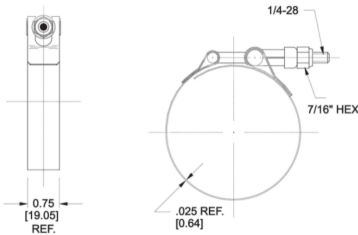

Requirements and Guarantees
